Enough is enough. Please do not waste any more of the Taxpayers money on this issue. The government FOR THE PEOPLE should spend more time and money ON THE PEOPLE instead of going after Microsoft.

While states continue to pursue this, I feel that it is not Microsoft's fault that Dell, E Machines, Compaq, and other manufactures put Windows on their computers. The consumers should be given the right to purchase their computer with LINUX, DOS, Windows, or whatever Operating System they choose. The computer manufacturers, however, want to SELL computers so they put the easiest operating system on them. which happens to be Windows.

We have people with health benefits being cut, people without homes living on the streets, no jobs, let's spend the money on helping those less fortunate. Again, this is a government FOR THE PEOPLE. Please help them out.

Thank you,  
Jeff Falkenstein
